DEMOCRATIC VALUES

Tina Theodossopoulou INDEPENDENT FOR MULGRAVE

1. SUSTAINABLE PLANET & SUSTAINABLE DEMOCRACY

Our world is growing and changing very fast. We should absolutely be pursuing new ways of living, in order to manage our resources better and help maintain a clean planet for future generations. It is equally important to build Systems and develop Policies that preserve the Democratic Rights and Privileges we have been enjoying so far. Whilst we live in an International Community and consultation with others is important, this should not override the will of self-governing Nations and their Citizens. I will pursue these values relentlessly.

2. ACCOUNTABILITY

There is obvious and abundant corruption and financial waste within our system! We simply need new ways to counter the disproportionate power held by government officials and their indiscriminate spending of tax-payer money! Perhaps establishing a separate 'jury' type Citizens' body to participate in proceedings when major issues arise. Another way would be to have a direct voting system to provide feedback on where Citizens' money should be spent. Circular Accountability - Bringing some of the Power back to the hands of the People.
